TUAN TRAN

Frontend Developer

Hanoi, Vietnam • 0346 731 336 • tmtuanyd@gmail.com • github.com/tmtuanyd
Hanoi University of Science and Technology • Automatic Control - Very Good • GPA 3.2/4.0

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 6+ years of experience building SaaS, enterprise, logistics, and Web3 applications using React, Next.js, and TypeScript. Experienced in frontend architecture, performance optimization, and delivering production-ready software throughout the full product lifecycle. Comfortable taking ownership beyond the frontend by contributing to backend services, authentication, cloud integrations, and cross-functional product delivery.

TECHNICAL SKILLS

Language: TypeScript, JavaScript, HTML5, CSS3
Frontend: React, Next.js, Redux Toolkit, TanStack Query, React Hook Form, Tailwind CSS, HeroUI, Material UI
Backend: Supabase, PostgreSQL, Next.js API Routes, REST APIs, GraphQL, NodeJs, Python
Cloud & Integrations: AWS S3, Lambda, MediaConvert, Firebase Cloud Messaging, Cloudflare, Stripe, Resend
Architecture: Frontend Architecture, Design Systems, Performance Optimization, Accessibility, Responsive Design, SSR, ISR,
Testing: Playwright, Jest, React Testing Library, Cucumber
Tools: Git, GitHub Actions, Vercel, Contentful, OpenAI API, Solana Web3

PROFESSIONAL EXPERIENCE

Support Dept. Oct 2025 - Present | Remote, Australia

Senior Frontend Engineer

- Owned frontend delivery from solution design through production release, ensuring new features remained scalable, maintainable, and aligned with evolving product requirements.
- Introduced reusable application patterns and contributed to architectural decisions that simplified feature development and supported long-term product growth.
- Worked directly with Product Owners and cross-functional teams to scope solutions, resolve technical challenges, and deliver reliable software in a fully remote Agile environment.

ANSYS ICA GmbH Dec 2022 - Sep 2025 | Remote, Germany

Frontend Engineer

- Delivered production-ready frontend features across multiple enterprise applications, taking ownership from implementation through production release.
- Improved code quality and development efficiency by building reusable components, promoting consistent frontend architecture, and participating in technical reviews.
- Collaborated with distributed product, design, backend, and QA teams to deliver production-ready software in Agile environments.

VMO Holdings Jun 2021 - Dec 2022 | Hanoi, Vietnam

Frontend Developer

- Delivered responsive web applications for international clients, taking ownership of frontend implementation across multiple projects.
- Improved maintainability and development speed by building reusable UI components and following clean frontend architecture practices.
- Worked closely with engineering teams to integrate backend services, deliver production features, and support Agile development processes.

Ilico Software Dec 2019 - Jun 2021 | Hanoi, Vietnam

Frontend Developer

- Built modern web applications for international clients using React and Next.js, delivering responsive and user-focused interfaces.
- Contributed to feature delivery, application performance, and code quality while collaborating with distributed engineering teams throughout the development lifecycle.

FEATURED PROJECTS

InsureVault

Insurance SaaS platform serving administrators, brokers, insurers, photographers, and end customers across web and mobile applications.

- Owned frontend development for a multi-role insurance platform supporting five user roles, delivering business workflows across policy management, appointments, customer portals, payments, and AI-assisted document processing.
- Designed reusable application architecture while implementing authentication, role-based access control, backend APIs, and database features to support scalable product growth.
- Integrated six third-party services, including Stripe, AWS S3, Firebase Cloud Messaging, Cloudflare, Resend, and OpenAI, to support payments, media management, notifications, customer communications, and AI-powered workflows.

Tech: React, Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, AWS S3, Firebase, Stripe, Cloudflare, Resend

Klarland Meet

Klarland Meet is a virtual collaboration platform enabling organisations to host online meetings, digital showrooms, and collaborative workspaces with real-time communication.

- Built real-time collaboration experiences supporting virtual meetings, shared workspaces, and interactive digital showrooms.
- Integrated Jitsi, Socket.IO, and Three.js to synchronize communication and collaboration across multiple connected users.
- Improved application scalability and maintainability through reusable frontend modules, performance optimization, and automated testing

Tech: React, Redux, Socket.IO, Jitsi, Three.js, styled-components, i18next, REST APIs, Jest, Playwright

Datameer

Datameer is a cloud-native data transformation platform that enables data teams to prepare, transform, govern, and deliver analytics-ready data through visual workflows, SQL, and pipeline automation within Snowflake.

- Developed enterprise data management interfaces for workflow automation, analytics, and reporting within a cloud-native platform.
- Built reusable React modules and GraphQL integrations that simplified feature development across multiple product areas.
- Strengthened application quality through automated testing, performance optimization, and continuous frontend refactoring.

Tech: React, TypeScript, REST APIs, MUI, Redux, GrapQL, dnd kit, Playwright, Cucumber

Webshop 3.0 (MIAB)

Webshop 3.0 is a multi-tenant SSR e-commerce platform powering multiple branded marketplaces across different regions from a shared frontend architecture.

- Architected reusable storefront components supporting multiple brands from a shared SSR codebase.
- Implemented authentication, GraphQL integrations, and server-side rendering to deliver scalable and SEO-friendly e-commerce experiences.
- Improved SEO, application performance, and code maintainability through shared frontend architecture.

Tech: Preact, React, Redux, Razzle (SSR), Auth0, Stripe, GraphQL

AIntivirus Website — Web3 Brand & Commerce Platform

Official multi-product web platform for AIntivirus — content, NFT-gated media, merch commerce, and trading services (eSIM, gift cards, trade-in) with Solana wallet integration.

- Led frontend development across marketing, e-commerce, and Web3 experiences, building a shared application that supported multiple business domains.
- Implemented wallet authentication, NFT-gated content, trading workflows, and headless CMS integrations while maintaining a reusable and scalable frontend architecture.
- Collaborated closely with backend and product teams to deliver secure blockchain integrations and production-ready user experiences.

Tech: React, Next.js, TypeScript, Tailwind CSS, HeroUI, TanStack Query, Zod, Contentful, Solana Web3.js, Mux, Framer Motion, GraphQL, OpenAI

Swfyft

Swyft is a customer-facing recommendation platform that guides users through complex product selection journeys using dynamic questionnaires, payments, mapping services, and personalized recommendations.

- Built customer-facing logistics workflows covering quote requests, bookings, shipment tracking, and order management within a large-scale web application.
- Designed reusable frontend modules and collaborated closely with backend engineers to deliver scalable APIs, business workflows, and production-ready features across multiple product areas.
- Improved user experience and application maintainability through responsive interfaces, reusable components, and continuous performance optimization

Tech: React, TypeScript, Material UI, Formik, TanStack Query, Monorepo, Stripe, Google Maps API, dnd kit, GTM
